## MATCHING WITH YOUR BRAND

# AN ECO-RESPONSIBLE PROJECT & AN APPROACH CSR

Our partners, suppliers, and subcontractors are chosen based on quality and environmental criteria.

We prioritize local suppliers and subcontractors or those located within the Greater Region (Belgium, France, and Germany) to reduce transport distances and therefore greenhouse gas emissions.

Since its inception, FAIRFAIR has always invested in high-quality, durable equipment. When we invest in equipment, the purchase is carefully considered to serve multiple clients and projects. The products must also minimize waste and promote recycling.

We are committed to sustainable business development, growing steadily and step by step.

At FAIRFAIR, we listen to our employees, offering flexible working hours tailored to the individual needs of our staff and their families.

We foster a relationship of trust between employer and employee through friendly management and transparent operations.

We regularly organize team-building activities, which encourages employee engagement.

FAIRFAIR also invests in employee development and ongoing training.

Another strength of FAIRFAIR is our clients' satisfaction and loyalty, we guarantee quality service.

We have maintained a client contact list that has remained unchanged since the company's founding in 2012.

The majority of our clients have trusted us for over a decade and appreciate our transparency and responsiveness.
